

MATH COMMUNICATION NETWORK

IMAGINARY
open mathematics

www.imaginary.org/network

The general public's interest in mathematics is gaining momentum. There are dozens of extraordinary projects around the world that bring the beauty of mathematics closer to the general public, and each one of these has very valuable experience worthwhile to be shared.

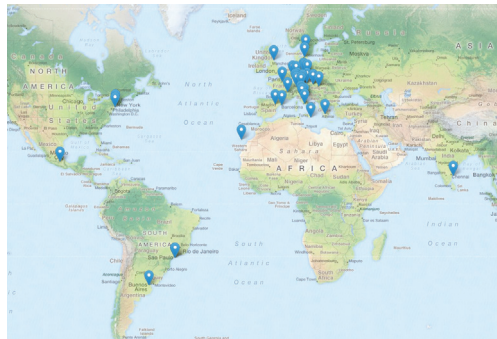

It is the opportune moment to build and link an open community of mathematics communicators. Math and science museums, traveling exhibitions, individuals devoted to the dispersion of mathematics – all these agents are not competitors, but rather provide outreach services that can benefit from an active exchange of experiences, opinions, and strategies.

IMAGINARY is an open repository of exhibits and resources for communicating mathematics, and its main exhibition, »IMAGINARY – through the eyes of mathematics«, has been displayed in more than 125 cities around the world. With this new project, IMAGINARY offers technical and human infrastructure to weave tighter this network.

A community of math dissemination already exists. If you wish to become part of this network, you can join our activities and even propose the next services to be implemented, or contribute ideas for

the general direction the project should take. We want everyone to form an integral part of the planning and implementation process of this new network.

Visit www.imaginary.org/network and contact us at network@imaginary.org.
