Make your own SURFER tattoos

With SURFER you can experience the relation between formulas and forms, i. e. mathematics and art, in an interactive way. You can enter simple equations that produce beautiful images, which are surfaces in space. Play with formulas, colours and perspectives to create your favorite image for your personalized temporary tattoos.

You'll need:

- Software SURFER (free download at: <https://imaginary.org/program/surfer>)
- Hardware:
 - computer, laptop, tablet, ideally one per person
 - Inkjet printer
- Temp tattoo paper (for inkjet printer)
- Scissors to cut the paper
- Water to apply tattoos to your skin
